Do you sell hardware?

Imported User 6 - 2019-04-29 - in FAQ's

We do not sell any hardware or packages. We are committed to creating software that can be used with any hardware manufacturer that wishes to work with us.

Motion devices and other complex hardware require a 'plugin' (small program that links Mach and allows control of the hardware) that are written by the hardware manufacturer. The quality of your system and functionality depend on good hardware and the associated plugin.
